

ZEYAD AHMED HELAL

Junior Full-Stack Developer

+20 127 563 5884 · zeyadhelal33@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#) · Port Said, Egypt

PROFESSIONAL SUMMARY

Full-stack developer who builds complete web applications end to end — React interfaces on the frontend, Node.js/Express APIs on the backend, and PostgreSQL for data. Shipped two full-stack projects from scratch: a banking simulation with authentication and transaction handling, and a hotel booking platform managing availability, pricing, and reservations. Currently completing a B.Sc. in Software Engineering at Suez Canal University, with front-end, back-end, and full-stack certifications from Codecademy and the Information Technology Institute (ITI). Comfortable working across the stack and picking up new tools as a project requires it.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, Python, REST API Design

Databases: PostgreSQL, SQL

Tools & Technologies: Git, GitHub, GitHub Pages (deployment), REST APIs, JSON, VS Code

Other Languages: Java, C++ (academic experience)

PROJECTS

Bank System | Full-Stack Web Application

2025

- Engineered a full-stack banking simulation supporting four core account operations — deposits, withdrawals, transfers, and balance inquiries — with secure user authentication and real-time transaction feedback.
- Built the frontend with HTML, CSS, and JavaScript, translating each banking action into a responsive interface with immediate visual feedback after every transaction.
- Designed and implemented RESTful API endpoints in Node.js and Express.js, including authentication middleware to protect account operations and enforce secure session handling.
- Structured user profiles and complete transaction histories in JSON, managing the full data flow from user input through backend processing to persisted records.

Tech stack: HTML5 · CSS3 · JavaScript · Node.js · Express.js · JSON [Live Demo](#) | [GitHub](#)

Hotel Booking System | Full-Stack Web Application

2025

- Built a full-stack hotel booking platform covering the complete reservation lifecycle — from room browsing and availability checks to booking, check-out, and expiration handling.
- Developed the frontend in React.js with Bootstrap Icons, creating a responsive interface for browsing rooms, selecting dates, and reviewing pricing before booking.
- Implemented backend logic in Node.js and Express.js to manage room availability in real time, calculate pricing, and process reservations across multiple payment methods.
- Built user and reservation management features, including automatic booking-expiration handling to keep room availability accurate without manual intervention.

Tech stack: React.js · JavaScript · CSS · Node.js · Express.js · JSON · Bootstrap Icons [GitHub](#)

Restaurant Website — Built an interactive restaurant site with a table-reservation form that restricts bookings to business hours.

Tech stack: HTML5 · CSS3 · JavaScript [Live Demo](#) | [GitHub](#)

E-Commerce Perfume Store (Aroma Luxe) — Built a full-stack perfume storefront with cart functionality, live stock tracking, dark mode, and Arabic/English language switching.

Tech stack: React · JavaScript · CSS · .NET [GitHub](#)

TRAINING & EXPERIENCE

Python Developer Training | Information Technology Institute (ITI)

Apr 2025

- Completed an intensive Python programming course covering core language fundamentals, control flow, functions, and file handling.
- Delivered a working project (Rock-Paper-Scissors game) demonstrating proficiency in Python logic, loops, and user interaction.
- Gained exposure to best practices for writing clean, readable code within a structured training environment.

EDUCATION

B.Sc. in Software Engineering | Suez Canal University — Faculty of Computers & Information

Sep 2023 – Present

Ismailia, Egypt · Expected graduation: 2027

- Relevant coursework: Data Structures, Algorithms, OOP, Database Systems, Software Engineering Principles.

CERTIFICATIONS

- Full-Stack Development Certificate — Codecademy (Aug 2025) and Information Technology Institute (ITI) (Aug 2025)
- Back-End Development Certificate — Codecademy (May 2025) · Front-End Development Certificate — Codecademy (May 2024)
- Python Programming Certificate — ITI (Jun 2025) · SQL Certificate — Codecademy (Jul 2025)
